**MOBIORG . COM**

Inbound/Outbound Inspection Management

Moscow,
2020

Our proposal

The Mobiorg cloud service simplifies the work of inspectors and dispatchers when receiving / shipping goods by producing, sending and automatically systematizing reports in real time.

Inspector App

**Dispatcher Desk**

Client portal

Cloud storage

Mobiorg architecture

Inspection Templates:

Receiving / Inbound
Shipping / Outbound
Goods Quality Control Photo-base Reports
Storage Control Reports
Damage Reports.
Inspection templates are configured during Mobiorg installation.

Web App

Mobiorg web application allows the dispatcher to control the inspection process in real time, as well as provide customers with the photo-based reports in Client Portal.

Mobile App

Report view

Inspection Journal

Template selection

Mobiorg mobile application allows the inspector to create and automatically send a photo report to the dispatcher computer without using additional photocamera and other photo applications on the phone.
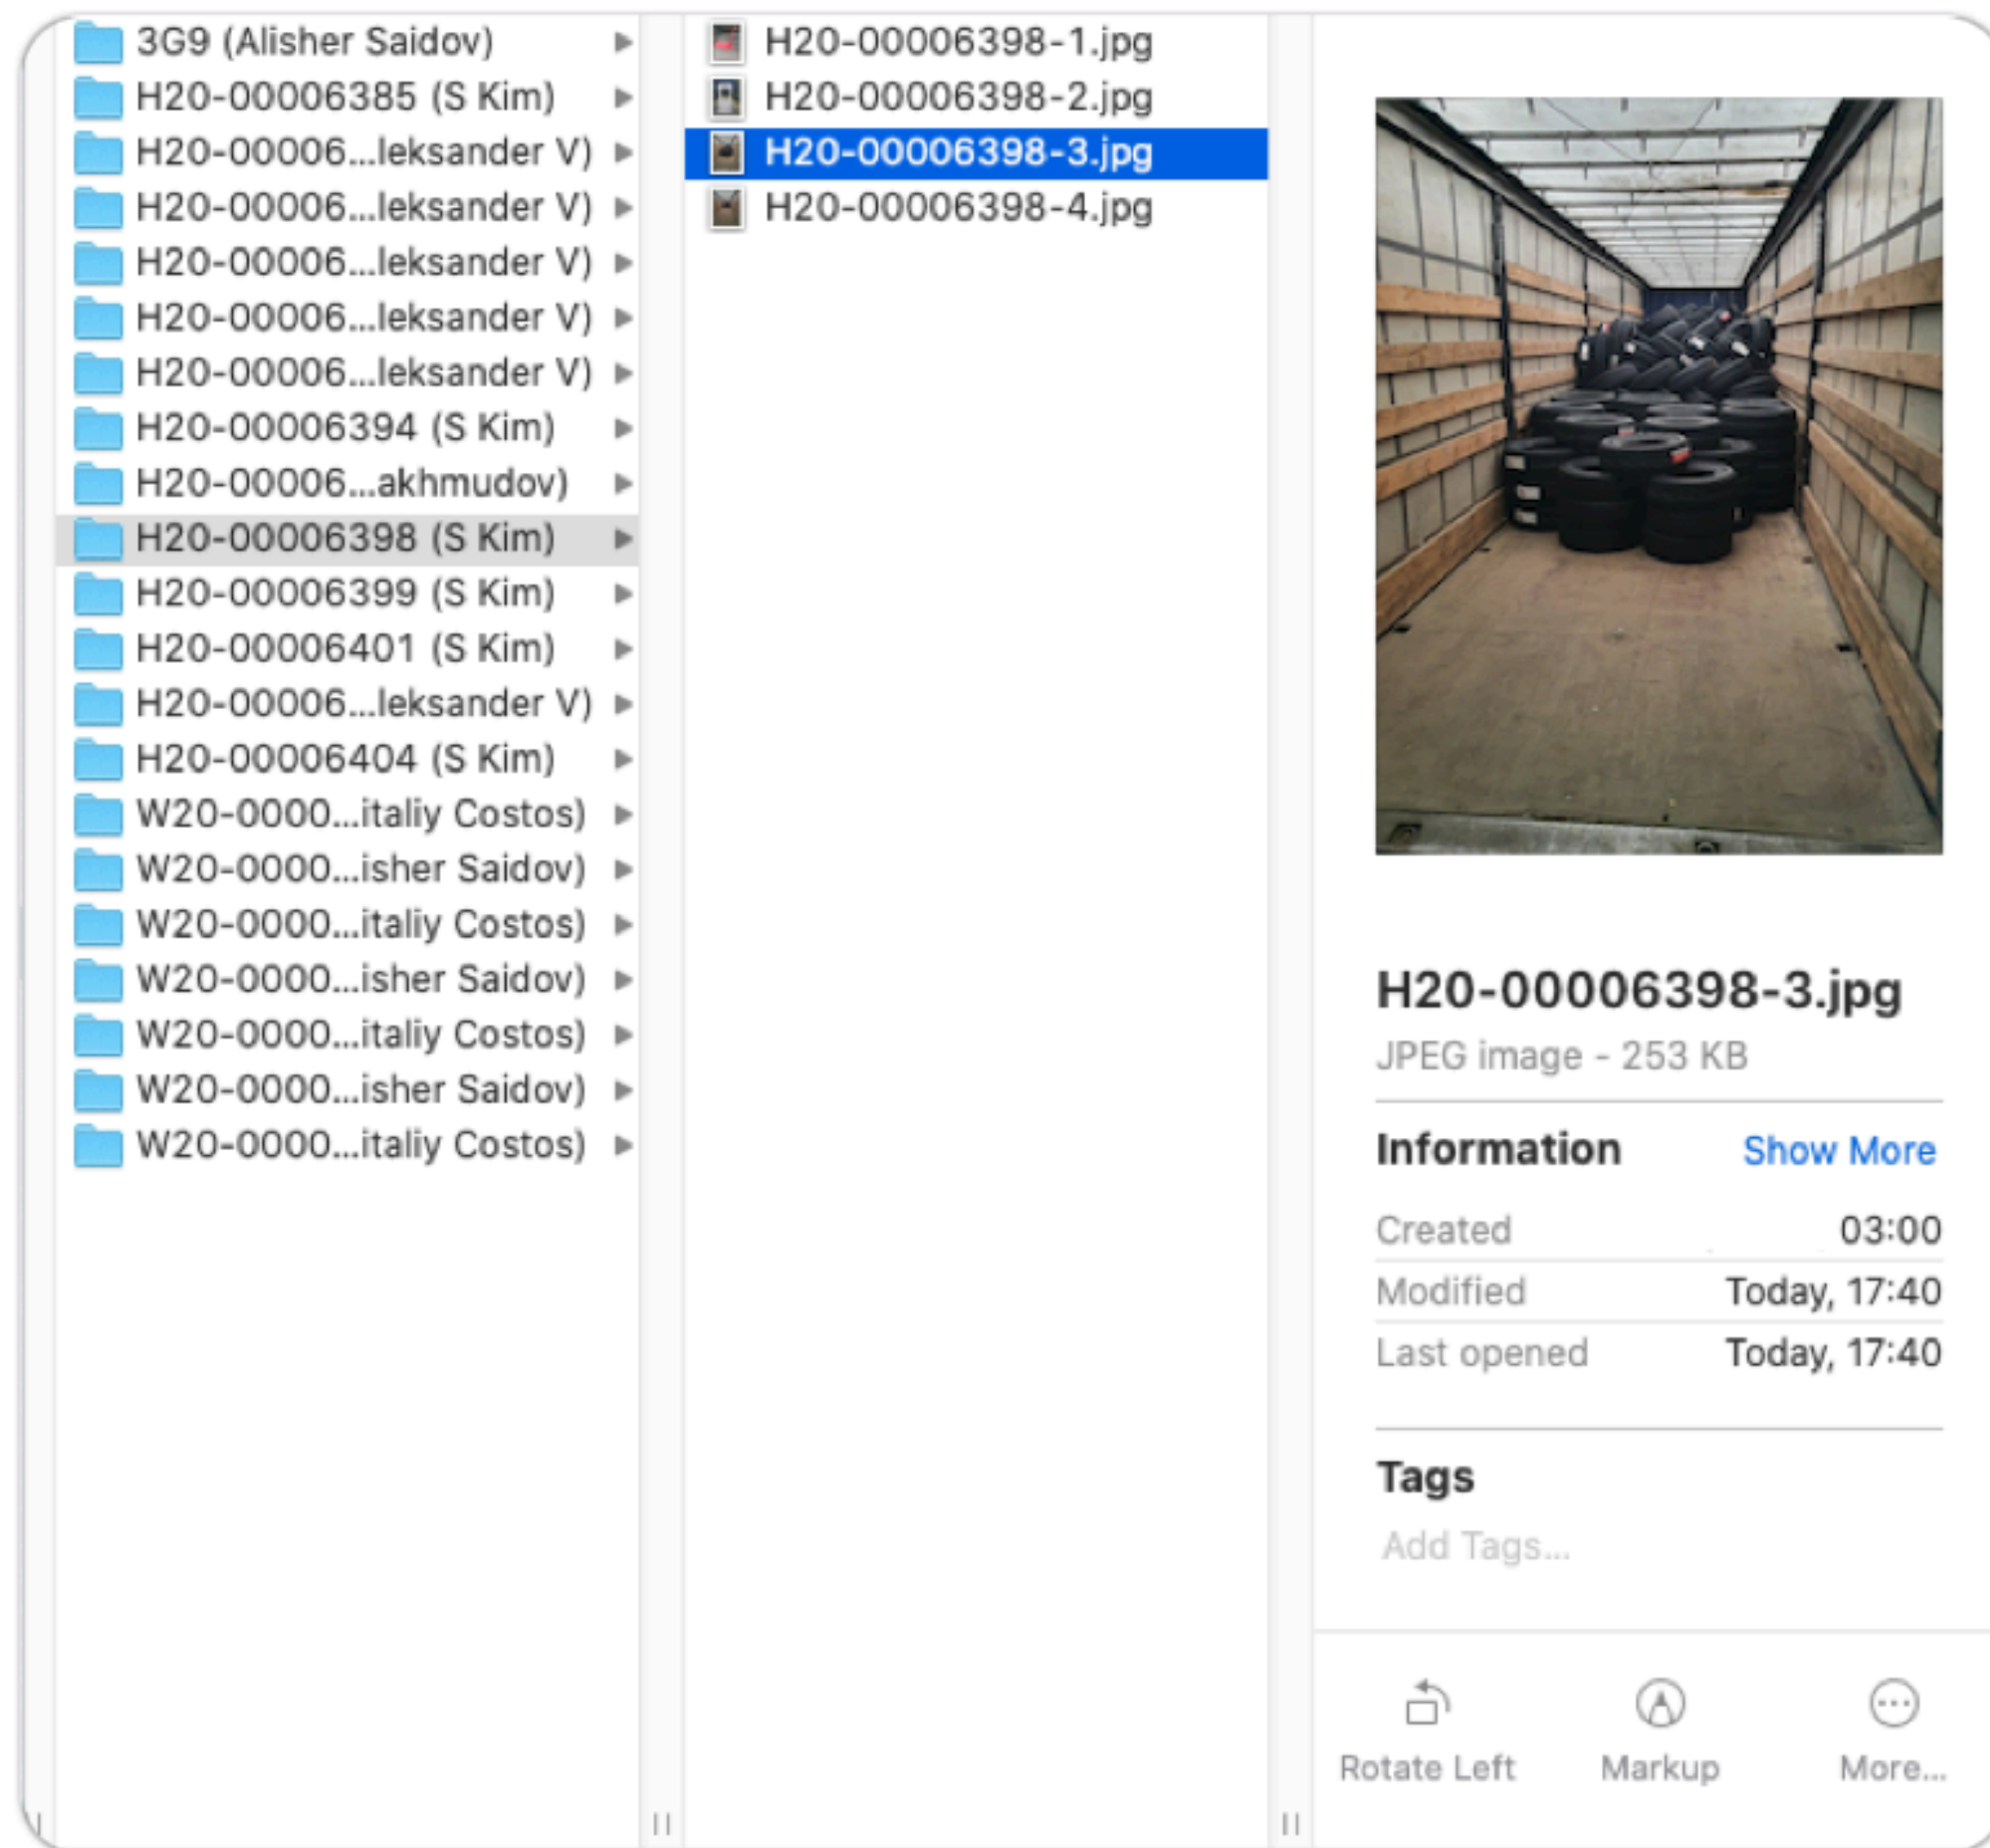

Report Template:

- Inbound/outbound number (typing, barcode or QR-code scanning, voice command)
- date/time (automatically)
- Inspector ID
- photos.

Actions:

- add photo
- publish/edit/delete report.

Virtual Disk

Working with reports in Virtual Disk mode

Mobiorg Virtual Disk allows the dispatcher to export and import photo reports as regular files and folders.

Additional features

- Client Portal for remote report reviewing by warehouse operator customers

- Image recognition and analysis by artificial intelligence algorithms

- Inspector work time control

- Automated report verification and analysis

- Warehouse operator KPI dashboards

- Inspection planner

- Automated access to the report archive by API reports and integrations with WMS and ERP of the warehouse operator.
